

2008 International Development Vice President Candidate

Stephen Bonneau

I've been working in the shipyard as an X11 ASOC Business Apprentice for 3 years. I have a 3 years old son and a fiancé. I've been with the ASSA on the publications committee for 8 months, writing numerous articles. I have volunteered multiple times for the ASSA and the Jaycees. I enjoy volunteering and helping out the community. I keep up with international news on a daily basis by watching the evening news as well as reading the newspaper and looking at several credible online news websites. I like to be up to date with world events that are going on and always look for way that I can help.

I believe that I would make an excellent candidate for the International Development VP. With my always current knowledge of world events and my willingness to find ways to give back to the community, would make me a prime choice for the position.
