

Research Committees

Materials Research Committee

The Materials Research Committee shall be tasked with producing research papers and associated presentation materials, of a technical nature, related to materials. This topic will include, but is not limited to; advanced materials for ship construction, as well as new components and component systems for shipboard use. The committee shall produce a minimum of one research paper per year.

These research papers are intended for publication in the national SNAME monthly publication. Additionally, these papers may be presented at a regularly scheduled meeting of the Student Section., as well to other members of the maritime community, as requested.

Processes Research Committee

The Processes Research Committee shall be tasked with producing research papers and associated presentation materials, of a technical nature, related to processes. This topic will include, but is not limited to; new processes for ship construction, as well as new processes related to the design, engineering and production planning of our core product lines. The committee shall produce a minimum of one research paper per year. These research papers are intended for publication in the national SNAME monthly publication. Additionally, these papers may be presented at a regularly scheduled meeting of the Student Section., as well to other members of the maritime community, as requested.
